

SPECIAL ORIENTATION EDITION

WELCOME, NEW STUDENTS

By Donald Holsten, President, ASUCMC

The ASUCMC Presidency rotates each year between the presidents of each school on campus. This year **Donald Holsten**, who is the Pharmacy school president, sits also as president of the ASUCMC Council.

Let me first welcome you to the San Francisco Campus of the University of California. This edition has been prepared as an aid to you by your fellow students at the Medical Center. We hope it will serve as an introduction to the campus, its facilities and its activities, which are available to all of you. On the following pages you will find the messages of Sandie Cadwalader from Nursing, Jim Liberman from Medicine, Dick Jennings from Dentistry, Dr. Herbert Johnstone and Dr. George Steininger. In addition there are notes on available housing, student organizations, and a directory of the campus.

The student body of the Medical Center is called the Associated Students of the University of California Medical Center—ASUCMC. The purpose of the ASUCMC is to help realize an important Medical Center goal—creating a bond among all students in the health sciences, so that with this bond each individual, upon graduation, is better

able to take his place on his community's "health team."

This I think you will agree is especially important when you consider that after graduation you must work, to work effectively at all, with the other members of your "health team"—not alone with other members of your individual profession.

Across the street you see a building nearing completion. This is the Guy S. Millberry Memorial Union, your Student Union. This is a step in realizing the goal of a united "health team." This building will provide a common meeting ground and those concrete and steel walls we hope to make the heart of the ASUCMC giving real mean-

ing to the word "Associated".

Some of the benefits of your Association with the students from other schools in the Medical Center are apparent right now. Others, and perhaps more important benefits from the standpoint for your professional career, will be fully apparent only after graduation. As with anything else, how much you benefit depends on how much you contribute to such an association. The quickest and easiest way for you to start realizing the benefits of your association with other students is to **join and support** the ASUCMC.

Again, welcome to the Medical Center—and best wishes for a pleasant and profitable residence.

A Message From the Dean of Students

HERBERT G. JOHNSTONE, Dean of Students

A hearty welcome to all of you who are starting your professional training in one of the four Schools on the San Francisco campus. In all probability the new environment of the Medical Center may be confusing at times and no doubt problems will arise during your adjustment to the new surroundings. Often such problems can be solved by a simple inquiry. The members of my staff and I are readily available to help you with any problem or difficulty which may arise. The Office of the Dean of Students, located in Room 52A, ground floor, University of California Hospital Building provides a variety of services for all students on the San Francisco campus.

Educational affairs of VETERANS attending any of the Schools at the Medical Center under federal and state laws are handled in the office of the Dean of Students. The **HOUSING SERVICE** maintains a list of rooms (most of which have kitchen privileges), apartments, flats and homes available to students, faculty, administrative staff and other campus personnel. **STUDENT LOAN FUNDS** are available for all students and information regarding these can be obtained from the Office of the Dean of Students. Information relative to the numerous **SCHOLARSHIPS** awarded annu-

ally on the San Francisco campus may likewise be obtained from the Office. If you have **FINANCIAL, LEGAL OR OTHER PERSONAL PROBLEMS** I shall be happy to discuss these with you at any time.

The Office of the Dean of Students makes every effort to help foster **STUDENT ACTIVITIES** and works in close cooperation with the various student organizations associated with the campus. Notices regarding **EDUCATIONAL AND CULTURAL PROGRAMS** taking place on the San Francisco and Berkeley campuses as well as in the various communities in the Bay Area are posted on the bulletin board on the first floor of the Medical Sciences Building opposite the Office of the Dean, School of Medicine. Ushering tickets are available for **EVENTS HELD AT THE OPERA HOUSE**. If you are interested in **PARTTIME WORK** you may list your name in our file and you will be notified if a position becomes available.

The members of my staff and I are interested in your problems and your general welfare. It is our hope that you will come to see us if you feel we may be of help.

Welcome and good luck. We're happy to have you with us.
DR. HERBERT G. JOHNSTONE
Dean of Students

THE SYNAPSE

U.C. MEDICAL CENTER

Vol. 2

San Francisco, Sept. 16, 1957

No. 1

Welcome Alumni

Last spring Synapse made its appearance on the Medical Center scene. It was produced then as a monthly while we were organizing and arranging the background of material and facilities necessary for the production of a newspaper of this kind. During the summer many of our problems have been ironed out, making it possible to produce a paper every two weeks during the next academic year. There will be fourteen issues in all. Seven each semester. The paper at present has a campus circulation of 3,800.

As Synapse plans to also include much information interesting to grads as well as campus students and staff we have investigated the problems and possibilities of placing you, the graduates of the Medical Center, on our mailing list. We have received enthusiastic cooperation from your alumni officers who see Synapse as an excellent way to supplement your quarterly bulletin with current announcements. We feel that your participation in the paper will keep you informed of Medical Center activities and advancements. We will welcome letters and reports from you for inclusion in future editions. In order that you will receive each copy promptly we are employing an automatic addressograph service. In order to cover mailing and production costs we are asking a subscription fee of only \$2.00 per year (14 issues this year).

Due to high costs we are mailing complimentary copies of this

Attention, Musicians

The San Francisco Medical Society Symphony Orchestra

A unique combination of medical and musical talent is to be found in San Francisco Medical Society Symphony Orchestra, a group in which all U.C. medical students, house staff members and their wives are welcome to participate. Musical enjoyment takes top billing at the regular rehearsals of the orchestra (unless, of course the phone interrupts to call a physician member back to his professional duties). A successful concert by the orchestra provided a fitting climax to rehearsals last Spring—with the program presented for the benefit of the Medical Society's Blood Bank.

In addition to furnishing an opportunity for continued contact with the world of music, the group affords its members a chance to become acquainted with others in their field, since the orchestra includes members of the medical profession from throughout the San Francisco area.

For further information about the orchestra, interested medical students and house staff members should contact the Medical Society headquarters at 250 Masonic Avenue, telephone West 1-7200.

Issue of Synapse with a letter and subscription form to a cross section of 1,000 graduates. The remaining 3,500 graduates will be contacted as soon as possible.

Get Your Medi-Cal Now

The 1958 Medi-Cal

The editorship of our campus yearbook, the Medi-Cal, rotates each year among the four schools—Medicine, Nursing, Pharmacy and Dentistry. This year a pharmacy student will serve as editor. The book is published at a cost of approximately \$5.00. It's a good idea to get your Medi-Cal early since they are usually cheaper then. They are sold all during registration in the same locality. If anyone is interested in joining the staff he will be most welcome. You may contact the salesman at the booth during registration to find out when the first meeting will be.

Do You Like to Sing?

Medical Center Choral Society

No, we don't mean are you a Kirsten Flagstad or an Ezio Pinza, but can you sing a melody without being threatened by your neighbors? If so, why not look into the possibility of joining our Medical Center Choral Society.

This friendly organization is composed of students, teachers and campus staff of all departments. This group believes that not only can worthwhile music be presented to the campus community, but that any awfully good time can be had in the process.

A colorful and varied program is planned for the coming year, including a Christmas program, the annual concert, and other exciting events, including possibly some intercollegiate activities.

Rehearsal dates will be announced shortly. Make this experience one of your activities for the year, and we feel sure that you will be rewarded.

Membership in ASUCMC

Membership in the ASUCMC is offered to students for \$10.00, \$8.00 of which is sent to the ASUC Berkeley Campus, giving us the privilege to attend the various functions both athletic and social held by that organization. The remaining \$2.00 is retained by the ASUCMC, constituting the organization's main source of income.

BUY A CARD!! SUPPORT YOUR ASUCMC.

Introducing . . . The Editors

1957-58 Editor

EDITORIAL

This first Fall issue of Synapse is designed with a dual purpose. First, to acquaint all you new students with the answers to your many questions and to introduce you to some of the people and activities you will encounter during your stay at the Medical Center. Secondly, we wish to re-orient all you old-timers with an up-to-date picture of campus life.

We are organized now so that we can bring you Synapse every two weeks this academic year. We now have a fully equipped office at 52C U.C. Hospital, an automatic mailing system, national advertising (to start soon) and a booking system for scheduling articles for any issue throughout the next year. We have a good line-up of informative features planned to make Synapse a reading must.

We have a larger staff than last Spring, but we still have several jobs to fill. We have had an organization chart and duty schedule mimeographed so that you might pick exactly what you would like to do in the paper. Each job is designed to be specific and small so that you can participate without becoming overburdened.

Join a growing organization—drop in and see us soon.

SPECIAL TERMS, IF YOU WISH

Greetings From The Graduate Manager Associated Students Medical Center

As the new school term of 1957-1958 gets under way, it gives me great pleasure to extend a hearty welcome to all the new students who are enrolling for the first time on this campus, and a special "Hello" to all the old-timers.

This new year will go down in history as a year of great achievement for the Medical Center Campus. Truly, the Center is growing up and becoming one of the great medical centers of the world. We look with pride at the new buildings which have been completed during the last two years, and the other buildings which are now under construction. It is my greatest thrill to watch the structure on the north side of Parnassus come to a reality. The Guy S. Millberry Union will soon take its place as the most important addition for Student-Faculty-Alumni welfare in the history of this campus.

It is anticipated that the Union will be completed in the early part of 1958, and those of us who have labored for so many years to provide such a wonderful facility are looking forward eagerly to the date of dedication. The opportunities and the challenges which this structure will provide for a more livable campus are manifold. You are about to become the beneficiaries of the efforts and generosity of many classes who have co-operated during the last thirty-five years that this dream might come true. For all of this we say thanks.

To those of you who are new on this campus, it would be interesting to learn how this project has been achieved. During the year's surplus from operations of our book and supply store has been deposited with the regents for a union building. This fund has grown year after

year to the amazing figure of \$225,000. The regents have agreed to match our gifts and in addition have agreed to match another \$200,000 to be obtained from the alumni of the four schools. The campaign for funds has been under way since the fall of 1953 and over \$300,000 has been subscribed. This is a wonderful expression of interest and is an indication that the project has the full support of

our alumni. Your days on "The Hill" are going to be more enjoyable because of this response.

During the next few months we will be setting up a completely new organization to operate the Union and I am looking forward with a great deal of pleasure in helping to get the program under way. We will need your support in great measure. I am sure you will give it gladly.

GEO. E. STENINGER, D.D.S.
Graduate Manager

Methodist Student Work

On the first of September, the Temple Methodist Church at Junipero Serra Boulevard and Nineteenth Avenue will add to its staff a full-time Student Director. He will lead the college youth of the church in special morning and evening programs each Sunday. He is the Rev. Thomas Hicks and hails from Prescott, Iowa. He received his under-graduate degree at Simpson College and his theological degree from Garrett Seminary in Evanston, Illinois.

Mr. Hicks will be concerned with meeting the needs and fulfilling the interests of Methodist students on all nearby campuses, including the U.C. Medical School. Any students who are interested in the beginning of a student program at U.C. should contact Mr. Hicks or the Rev. Larry Whitfield, senior minister at Temple Church. The telephone numbers are JU 6-1444 or JU 6-1445.

Tentatively planned on the program for the fall semester are a Welcoming Banquet, special student rallies, a snow-trip and work projects.

At this time Temple Methodist Church wishes to announce the formation of an evening Fire-side Group for Young Adults at the home of Mr. Whitfield, 455 Urbano Drive, in Ingleside Terrace. If you are interested in attending a group for folk from 20 to 40 years of age, married and/or single, call Temple Methodist Church and leave your name and address so the announcement concerning the opening session can be sent to you.

At present a class for students meets at 9:30 Sunday morning under the leadership of Dr. Robert Thornton, professor of Mathematics and Physics at State College. Preaching services are held in the sanctuary at both 9:30 and 11:00 a.m. for the convenience of worshippers.

Inter-Fraternity Council

The Inter-Fraternity Council is a campus-wide student organization composed of equal representation from each fraternity. The Council has for its objective the promotion of fraternity welfare on campus, the sponsorship of social and athletic inter-fraternal activities, and the dissemination of information and guidance of pre-professional and undergraduate students.

CAL CLUB

The California Club was organized in 1934 by its present president, Dr. Robert Gordon Sproul. The San Francisco Chapter was established by President Sproul in 1939 with Dean Herbert Johnstone as faculty advisor.

The primary objective of the organization is to promote harmonious relations between the student groups of the several campuses of U.C. by striving to maintain the highest possible

Newman Club Party For New Students

For the past five years, the Newman Club of the U.C.M.C. has been serving the needs of the Catholic student on campus in religious, intellectual, and social aspects. This year, chaplain Father Bernard Moran and the officers are looking forward to two more successful semesters of Newman activities. The officers elected for the coming year are Dick Penna, president; Mary Lou Stogden, vice president; Fred Soares, Treasurer; Mary Ann Lorenz, corresponding secretary; and Deanna Daclan, recording secretary.

The first function planned is a Newman Get Acquainted Party, which will be held on September 25 in the auditorium of the 610 Parnassus nurses' dormitory from 8 to 12. There will be dancing, refreshments, and top-notch entertainment. Following this, on Sunday, October 6, the Newmanites will retire to their Mount St. Helen resort in Los Altos for their semi-annual picnic. Swimming, sunshine, sports, and a deliciously prepared lunch await those who attend. Other activities on the agenda include: lectures on such subjects as Medical Ethics, Communism, and Marriage; evenings of recollection; and Communion Breakfasts.

DICK PENNA
President.

standards of sportsmanship, friendship and cooperation.

It was through the efforts of the Cal Club that an All-University newspaper on Charter Day was established. More relative to our own campus, was the establishment of the ASUCMC. The Cal Club is also responsible for the preparation of the president's reception for new students on this campus and for the execution of a successful orientation program throughout the year.

SPORTS

By MITS FUKUMURA

MED CENTER BASKETBALL HI-LITES

This year as in the past the associated students of the Med Center will have an intramural basketball league. All games will be played at the Polytechnical high school gymnasium, and the first series of games will begin on the first week of October. There will be four scheduled games per week, two being played on Tuesday and two on Wednesday. The first of the two games will be played at 7 o'clock and the second at 8 o'clock. The gymnasium will also be open on Thursday nights for those who wish to practice.

All of the fraternities, classes, or faculty members on campus may organize a team and enter the league. Those who are interested please contact Mits Fukumura at 330 Parnassus Ave. or phone SE 1-9846.

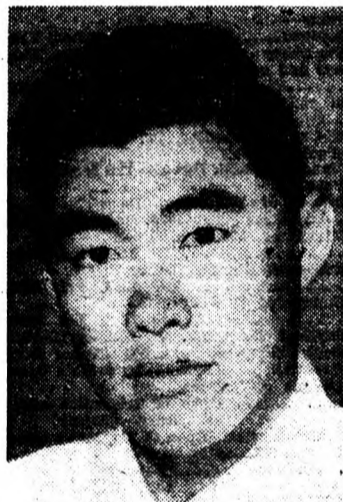

Last year the Soph Meds, led by Bob Albo, won eighteen straight games and the championship. During previous years, however, the Zips have been dominating the league. But regardless of who wins, the major purpose of this league is to give the students a break from the books as well as recreation, relaxation and fun.

DENTAL SCHOOL PICNIC SPORTS ACTIVITIES

The Dental students, along with the hygienists and faculty members, will again have a day off this year for their annual picnic. Besides free steaks, this event is highlighted by many sports events and prizes. As usual there will be a golf tournament, and there will be a money order prize for the winner. Those who are interested should contact Dr. Mitchell for further information. For those who wish to enjoy the picnic with less frustrations, there is always baseball. Each dental class as well as the hygienists will have a team. There will be four games in order to decide who is champion. Those wishing not to get dusty can always play tennis or table tennis. Money order prizes will be given away in these activities also. For those who like a rugged game there is always football.

GOLF TOURNEY PLANNED

An all-Med-Center golf tournament is being planned for all students and faculty members. Tentatively, it will begin next February and each contestant will be required to play a total of 72 holes. Various flights will be formed and the winner of each of these will receive a trophy. Further information will be posted around school and appear in later issues of this paper. This is just a preliminary announcement in order that all golfers as well as duffers can begin to warm up.

DENTAL SCHOOL PICNIC
OCTOBER 3
SAN MATEO PARK

MEDICINE

JIM LIEBERMAN
President, ASSM

Hello, again, Class of '60 and welcome to your Medical Center campus where you will spend two of your next three years. Welcome to the patient and what's wrong with him—for you are embarking on your more clinical studies which will become more and more time consuming but of greater and greater interest to you.

You are arriving at a campus which is in the midst of a large construction program. A new Medical School Building is under construction as is an all-campus Student Union. Chronologically it is an old campus, but organizationally speaking it is new. Organizations you will be concerned with include your ASSM, SAMA, and ASUCMC. The ASSM is your medical student body organization with which you are already familiar and which serves you in many ways. You are invited to all its meetings and will be informed of all its activities by your class representatives. Another organization familiar to you is the Stu-

Everyone at U.C.
Medical Center
reads the
SYNAPSE

dent AMA which yearly assumes greater importance nationally among medical organizations, and membership in which brings many benefits to you, including a remarkable life insurance program. The ASUCMC is new to you for it is the student body organization of the entire Medical Center Campus representing all the schools. In addition to these organizations there are the numerous fraternities, religious clubs, and specific activity groups.

An important thing to keep in mind is that you are sharing a campus with students of five related fields in medicine and consequently you should not let this opportunity to make many new friends slip by you. Assisting the mixing of students is the small area of the campus and the centralized off-campus living facilities for students. Then, too, there are all-campus programs including dances and a reception for new students.

One disadvantage which will be rectified when the new Medical School Building is completed is the fact that due to campus rotation you never get to become well acquainted with the classes on either side of you. So be prepared to share the "Ivory Tower" with some brand new high-and-mighty seniors. They're a pretty friendly lot so it won't be much trouble getting to know them. They especially like to answer questions for they are just now getting used to hearing themselves talk. Always feel free to go higher up for advice. Your faculty is here because of you and will gladly help you in any way possible. Take full advantage of the Preceptorship Program, and remember, it is your obligation to contact your preceptor if you have not yet met.

Lastly, here are a few things you might want to look into: fellowships, spare time research, opportunities to view surgery or a delivery on Saturdays, money from blood donations, and human guinea pig experiments.

We're glad you're with us, Class of '60. Make the most of these years.

Messages From The Student Body Presidents

What Every Dental Student Should Know

'Welcome Dental Freshmen'

It is my sincere pleasure to welcome you to this new campus, and this new way of life. Dentistry is much more than just a profession, it is truly a way of life. Your entrance here at Cal places you squarely in the middle of this way of life.

There are many differences in the experiences you have had previously on the college level, and those awaiting you in the ensuing four years. Dental school is extremely demanding of the student, not only in time, but in mental and mechanical anguish. We have a high academic standard to maintain, but at the same time the vocational aspect of dental school is equally and sometimes more demanding.

Our contribution to health service cannot be measured on a curve. It must be recognized and judged, according to a standard, not of perfection, but of time-proven adequacy. Your work in the next four years will help prepare you to meet and surpass this standard. We do not strive to do work that would satisfy us, because our own standards may be lower; but we, in dental school, are confronted with a standard of excellence proven in the highest tradition of adequate and successful dentistry.

Please recognize that the faculty is composed of leaders in the profession, and are here for their professional ability, not as proven educators. It presents a plan of education where the student must seek to learn, as well as the teacher to teach, if we are to attain the ultimate from

places one of the main contributing factors to success right in the lap of the student. Attitude—Fellows, believe me, the attitude you have toward dentistry, the school, your fellow classmates and the faculty, will determine the success or failure of your professional careers.

Dental school as well as a dental practice is a big job. Accompanying the work are great rewards. Financial independence

RICHARD JENNINGS
President, Associated Dental Students

may or may not come, and it is a minor reward in comparison to the profound satisfaction in rendering a truly fine service. Individual integrity is the backbone of dentistry. We students at Cal seek to attain and offer competency with humility and conscience in serving our fellow man.

A second factor in the list of hazards to discuss is your ability toward organization. Proper management of your time will spell success where the converse will spell failure, not only in school but in practice. Good or poor management of economic resources also, will be reflected by the way you organize and manage here in the next four years. Be systematic, be prompt, be effective, be optimistic. Be clean physically and mentally. Be alert, be friendly. Every student in the school should be your friend and will be, if you observe these principles of conduct becoming the profession of dentistry. Every upper classman will be a big brother to you to help ease the burden. Your student body offers a hearty welcome to you at the beginning of this promising year.

NURSING

SANDIE CADWALLADER
President, Nursing Student Body

To the Freshmen Nursing Students,

Welcome one and all to the University of California Medical Center from the Nursing Student Body. We are very glad to have you here to join us in our own student body and to be members also of the student body of the campus. As you will learn there is a busy year ahead of us starting with the ASUCMC Welcome Dance and our own "Get Acquainted" parties. The fall semester also holds for you the football game and related activities at the Berkeley campus which you can take part in by purchasing the ASUCMC Student Body card.

We have planned for you a very thorough orientation into the student body activities so that you can begin right away to take an active part in them. You will find that we not only have our own functions, but as members of the Student Nurses Association of California there are meetings, conventions, and get-togethers in our area that will enable you to meet and compare notes with the nurses from other schools. This, you may find, adds a great deal in your professional education. This atmosphere of personal teaching

total experience of learning to be a professional nurse.

You are fortunate too in that you will be one of the first classes to use and be a part of the new Student Union. You will be hearing a great deal about it and, of course, the evidence is visible as the work in the building progresses each day.

We are looking forward to meeting and working with each and every one of you, and hope that we can answer any questions you might have and help you get acquainted with your new home.

HOUSING

Finding suitable living accommodations at a reasonable cost has been a problem on the San Francisco Campus for some time. The Office of the Dean of Students on the ground floor of U.C. Hospital, Room 52A, maintains a list of rooms (most of which have kitchen privileges), apartments and flats for the convenience of students.

In addition to the above, married students have found satisfactory living accommodations in some of the housing projects owned and operated by the City and County of San Francisco. The most favored are the Sunnydale Housing Project in Visitation Valley and the Valencia Gardens Project in the Mission District. These are low income housing units and are available to married students with children. To apply for this housing the following forms are needed:

1. Marriage Certificate
2. Children's Birth Certificates
3. Veterans: Discharge papers and G.I. entitlement statement.
4. Non-Veterans: Proof of income student will be dependent upon throughout his schooling.

Applications are made in person at:
Housing Authority, City and County of San Francisco.
440 Turk St., San Francisco

"I'LL MEET YOU AT THE MILLBERRY UNION"

Sorry—we can't do it this semester—but it won't be long now.

YOUR NEW UNION BUILDING didn't just HAPPEN. It is the result of long years of work and planning.

The co-operation, interest, and devotion to the cause by Students, Faculties, and Alumni have made the UNION possible.

YOUR CONTINUED SUPPORT AND APPRECIATION WILL MAKE IT GO. ASK ABOUT OUR REBATE POLICY.

KEEP THE HABIT OF MAKING YOUR PURCHASES OF BOOKS, STATIONERY, AND SUPPLIES AT

The Associated Students Medical Center Book and Supply Store
