**HAPPY
EASTER**

CHARTER DAY CEREMONY 90th Birthday

(Photo by Ted Nakata)

The University of California's 90th birthday celebration, Charter Day, was held Wednesday, the 19th of March, in the new gymnasium of the Guy S. Millberry Union.

There were so many different events which made the ceremonies meaningful to all of us here at the Medical Center, students, faculty, alumni, and friends, that it was an exceedingly full hour.

First, was the size and beauty of the new gymnasium which was filled with a standing-room-only crowd of over 600. If its appearance has whetted your appetite for the rest of the facilities at the Union, there will still be a wait until at least the middle of May.

Dean Fleming, who was presiding over the ceremony, spoke about the ninetieth Charter Day and on the retirement of President Sproul. He also mentioned how fitting it was that Dr. Steninger should be the first one to raise his voice in song in the Union, for he was the one who did the most to make it possible. Dr. Steninger received a fine ovation for his two selections, the "Desert Song," and "I Love Life."

The principal speaker, Dr. Wendell M. Stanley, Director of the Virus Laboratories on the Berkeley Campus, talked on Health Sciences in the USSR. One of the main points was that we were losing ground at an increasing rate in scientific educa-

tion, which is the key to the balance of power which would prevent another major war.

He pointed out that, under the coordination of the Russian Ministry of Health, enormous strides have been made in medical research and education. The Ministry's budget has increased over 400 percent in the last 15 years. They have built up 160,000 clinics in every part of Russia. There are 79 medical schools and 12 post-graduate schools for advanced work. There is a great financial incentive to do such work as to be selected to take advanced degrees and possibly be elected to the Academy of Medical Sciences.

Dr. Stanley pointed out that medical sciences are actually taking a back seat to the physical sciences in Russia today, but even with ill-equipped facilities, great strides are being made to close the gap between Russia's and the Free Nations' level of knowledge. He said we must take action, but in our own way, to compete—to be able to win in a cold war.

FACULTY RESEARCH LECTURE

Diabetes, a major medical problem, has also provided a valuable approach to some fundamental questions in physiology, a University of California School of Medicine faculty member said today.

Dr. I. L. Chaikoff, professor of physiology and a pioneer in the use of radioactive tracer techniques in biological studies, gave the first annual Faculty Research Lecture at the U.C. Medical Center, San Francisco. Nominated by his colleagues to speak on a research subject of his choice, he discussed the mechanisms by which the body controls its production of fats and fat-like substances—especially the group of compounds known as fatty acids.

Part of the sugar and other carbohydrates in the diet are converted to fatty acids. Greatly-reduced ability to carry on this conversion process is one of the characteristic failures in diabetes.

Beginning about ten years ago Dr. Chaikoff and his colleagues (chiefly S. S. Chernick and E. J. Masoro) took advantage of this failure by studying the handling of sugars in the bodies of diabetic and normal rats. They used sugars labeled with radioactive carbon and thus traceable through a series of metabolic conversions.

The investigators found an important difference between the diabetic animals' handling of two very similar sugars—glucose and fructose. While the diabetic animals' ability to use glucose was much impaired, they burned fructose at nearly normal levels. This led the researchers to define one of the major metabolic blocks in diabetes: a failure at a very early step in the utilization of glucose, before its metabolic pathway joins that of fructose.

Diabetes actually involves two separate failures in the metabolism of sugar, however. This was indicated by the finding that, while diabetic animals were able to dispose of fructose by oxidation or burning, they could no more make fatty acids from fructose than they could from glucose. Hence, Dr. Chaikoff stated, (Continued on page 2)

NURSES TO HOLD A.S.U.C.M.C. ELECTIONS

The Nursing Student Body on March 26th to 27th, as announced by President Mary Dilley, will be holding elections for the 1958-1959 A.S.U.C.M.C. president. This office, as the A.S.U.C.M.C. constitution states, will rotate within the various schools, yearly, as follows: School of Medicine, Dentistry, Pharmacy and Nursing. Last year it was with enthusiastic leadership that this position was held by the School of Pharmacy, hence the School of Nursing will preside this coming year. It is with great thought and en-

thusiasm that the school of nursing approaches these elections. It is their hope that all of the schools will look with sincere interest toward the coming school year. The Medical Center as an active Student Body will be progressing by leaps and bounds in 1958. To prepare for this revolutionary advancement the A.S.U.C.M.C. council is at present revising the constitution into a workable resource. The council has been actively participating in the structuring of our new stu-

dent union. It is also working on the campus orientation program for new students, which it hopes will help to better acquaint these students, early in their careers, with the functions and possibilities of their campus.

It is, therefore, with careful consideration that the Nursing Student Body introduces to you their nominees for A.S.U.C.M.C. president. Both nominees are members of the 1960 graduating class, and have actively participated in Medical Center functions. Joan Darby hails from Dannville and previously attended the University of California at Berkeley, where she was freshman class vice-president. Marcia

MARCIA REHFUSS

JOAN DARBY

Rehfuß claims Oakland as her home and is a graduate of the University of California at Berkeley; here she participated in the formulation of the new judiciary committee and also served as a class officer.

Watch the forthcoming Synapse for an introduction to your new A.S.U.C.M.C. president.

Board of Governors

Union Fee Collection Vote

Next semester and all semesters thereafter the students, as well as other groups who will use the Millberry Union, will be subject to the payment of a fee to help defray the operational costs of this new enterprise. The details of why this fee is necessary has been explained in prior issues of The Synapse.

The Board of Governors, which includes a representative from each segment of campus life, has yet to decide the exact amount of this fee. However, reliable sources indicate that the student fee will be in the neighborhood of an annual \$10.00. Mr. Alexander stated that each student should reap a 700 percent return on his money in free and almost free activities which will be available to him at the Union.

The alumni, the faculty and the students each have a responsibility to the Union: each group will be responsible for the

amount assessed that group by the Board of Governors. The actual collection procedure will be unique to each group.

Since it is a required fee similar to the student health fee, the problem is not one of where the student is asked to pay, but rather how and when to pay. Since the fee is \$10.00 for two semesters the Union Board and the A.S.U.C.M.C. feel that it could be collected most efficiently and painlessly at the rate of \$5.00 per semester with the registration fee. In order that a non-academic fee may be collected this way a student vote is required by the University.

Within the next two weeks, a ballot will be passed in each class; each student is asked to vote that this fee be collected at the time of registration. Collecting the fee at any other time will be both costly and time consuming.

Food Survey Due Today

Mr. Kurt Stein, the Millberry Union Food Service Manager has designed and distributed a food service questionnaire to all class officers. It is claimed that the way to a man's heart is via his stomach and also that the basis of discontentment often lies with poorly prepared food, poor timing or a lack of selection of same. True it is impossible to please everyone all the time, but it is not hard to keep the majority happy IF they express their desires. As basic as this issue may seem, **IT IS IMPORTANT**—Mr. Stein is most anxious to give the student body the kind and variety of foods they want—when they want it. He hopes to keep trial and error down to a minimum.

The questionnaire is simple, it will require only a few moments to fill out. It was distributed to your class officers on March 19—**IT IS DUE TODAY**—Please take a moment, fill it out and get it back to your class president. The results will be made available shortly.

A GRADUATION FUNCTION ON THIS CAMPUS

Earlier this semester it was hoped that a graduation function on this campus would be possible, however, now it seems highly improbable. It was hoped that July 1st, the target date for completion of the Union could be pushed a little so that all the facilities would be open for a ceremony on June 13. July 1 is now a very real date in the eyes of all the people trying to meet this schedule, so for one more year no graduation ceremony on this campus is being planned.

THE NEXT MEDICAL CENTER STUDENT BODY PRES.

Every four years, here at the Medical Center, a woman accepts the gavel as president of the entire student body of over 1400 professional students. This is made possible by a student charter regulation which requires that the presidency rotate between each of the four schools.

Much of the struggle and debate which has brought the A.S.U.C.M.C. from a weak-kneed baby to a power to be reckoned with has occurred within the past two years under the able leadership of Mel Frank from dentistry last year and Don Holsten from pharmacy this year. Each of these gentlemen served concurrently as president of his own school. Neither school suffered as a result of its president's dual role, however the stature of the A.S.U.C.M.C. is beginning to demand more than one person can conveniently accomplish and at the same time do justice to his own school.

With this thought in mind, the Nursing student body has decided to have one of their members as president of the nursing student body and another as president of the A.S.U.C.M.C.

This is a move which we hope will start a trend. Each of the schools here demands considerable time and effort from each student, and no one should be asked to jeopardize the basic reason for his being here in order to carry out another worthy and equally demanding task. Therefore division of power not only is practical, but imperative.

The new president elect, when she accepts the gavel of office, will accept with it a trust and a challenge far greater than any of her predecessors. She will be the first president to lead the student body during the first year of operation of the Millberry Union. The position not only requires, but demands that this person be informed, tolerant, determined, dedicated, and above all, hard-to-discourage. The position will hold great honor for the person who wins the election, but it will have its disappointing moments—especially if this person is truly dedicated.

The nurses have always been a close knit group on campus, and they are well known for their ability to get things done. Their dormitory style of living has done much to achieve this end.

The nurses will do much to make their year in office a great success, but they must have everyone's support—this next year they are leading, but it is up to us to follow their lead!

Intercampus News . . .

All-University Faculty Conference

The 1958 All-University Faculty Conference, thirteenth to be sponsored by President Robert G. Sproul since 1944, and the last before his announced retirement on June 30, 1958, will be held at Santa Barbara College, April 2nd, 3rd and 4th, 1958.

Appropriately, the theme of the Conference will be "The University of California: Retrospect and Prospect," and discussion will be devoted to four study committee reports: 1) The Aims of Statewide Educational Policies, 2) The Implication of Statewide Educational Policies, 3) The Faculty of the University, 1957-70, and 4) Educational Policy and Research.

Programs containing the printed reports of the study committees will be distributed to all delegates to the conference for reading and analysis about two weeks in advance of the conference date.

Four Regents of the University have accepted invitations to attend as special guests: Cornelius

J. Haggerty, Jesse H. Steinhart, Mrs. Catherine C. Hearst, and Philip L. Boyd.

Delegates to the Conference from the Medical Center are Robert F. Brigante, Denture Prosthetics; Leon Goldman, Surgery; John B. Lagen, Medicine; Helen E. Nahm, Nursing; Herman P. Riebe, Operative Dentistry; Dallas L. Tuck, Chemistry; and David A. Wood, Oncology.

Radiologist Awarded Medal

Dr. Ross Golden, Visiting Professor of Radiology at the Medical School, has received the College Gold Medal awarded by the Chancellors of the American College of Radiology. The medal is the highest honor the Board can bestow upon one of its members.

Dr. Goldman was honored "for distinguished and extraordinary service to the American College of Radiology and to the profession for which it stands."

Society Elects President

Dr. Leo G. Rigler, Visiting Professor of Radiology at the Medical School, has been installed as President-elect of the Radiological Society of North America.

Dental Student Body Elections

Vice president Gerry Geerneart has announced the forthcoming Dental Student Body elections. The offices to be filled will be those of President and Vice President, which are to be elected from next year's senior class; Secretary-Treasurer, and Social Chairman.

Petitions will be available in the office of the Dean of Dentistry, and from the class presidents on Monday, April 7th. The deadline for the completion of these petitions will be Friday, April 11th. The petitions should be turned in to the Dean's office by 5:00 p.m. on that date.

Elections will be held in the morning classes on Monday, April 14th.

PLAN TO GET OUT AND SUPPORT THE CANDIDATE OF YOUR CHOICE!

English Pharmacist Visits Campus

Dr. Arnold H. Beckett, faculty member of Chelsea College of Science and Technology of London, England, last week conducted two seminars sponsored by the School of Pharmacy. One discussion was centered about his specialty, on which he has done world-recognized research—chemical relationships in the action of synthetic analgetics. The other topic, equally interesting and of great present-day importance and application, was concerned with the mode of action between bacteria and antibacterials.

Dr. Beckett graduated from the University of London School of Pharmacy in 1942, and served on the staff in Pharmaceutical Chemistry there until he received a Ph.D. degree in 1950. Since that time, he has been a senior lecturer in Pharmaceutical Chemistry and Research Director in that department at Chelsea College. During his leave of absence this year, he has been continuing his research work at Smith, Kline, and French Laboratories in Philadelphia. He has spoken before many groups while in this country, including this month's joint meeting of the Northern California branch of the A.P.A. and the Society of Hospital Pharmacists, at which he discussed the educational, scientific, and social aspects of Pharmacy in Britain.

Lecture

(Continued From Page 1)

failure to produce fatty acids results from a second block in sugar utilization, further along the metabolic chain.

Both of these metabolic blocks may be reversed with insulin. Diabetic animals given insulin were able both to oxidize sugars and manufacture fatty acids from them. When animals were given insulin and then sacrificed, their isolated livers were also able to carry on sugar-metabolizing reactions.

The researchers further observed that if animals were given abnormally large amounts of fructose for prolonged periods, their ability to metabolize glucose was temporarily restored to nearly normal levels.

The Faculty Research Lecture, given for the first time at the U.C. Medical Center Wednesday, is a traditional part of Charter anniversary observances on other campuses of the University.

LETTERS TO THE EDITOR

Dear Editor:

Just in case you have a sliver of white space in Synapse to spare, I would like to comment on Yasin Balbaky's "Murder and the Social Unit," which appeared in the March 14th issue.

Mr. Balbaky seems to have missed the whole remarkable point of the Stanford murder case. He deplores so much, is so busy, in fact, deploring almost everything about our "modern society," that he fails to recognize the other side of the coin.

In what earlier phase of history would the father of the murder victim seek help for the murderer, rather than his destruction? Is this an indication of a "sick" society? Murders have always been committed; murder is nothing new and is not a "side effect" of the 'Machine Age' or

'Age of Industrialization,' as Mr. Balbaky seems to contend. History, modern and ancient, has had its full share of murder, both motivated and apparently senseless ones, and there is really nothing so very remarkable about the fact that they continue to be committed in our time. What is remarkable is man's newly acquired ability to deal with social aberration in some meaningful and constructive way, rather than crying for blood in the voice of his ancestors.

There are doubtless many lessons to be learned from the Stanford murder case, psychiatric and otherwise—but I have strong doubts that it can or should be used to demonstrate "the deplorable state of our society."

(Mrs.) Dorothy Deskins Langley Porter

Anesthesiologist Appointed

Dr. Stuart C. Cullen, one of the country's most distinguished anesthesiologists, has been appointed professor of anesthesia and chairman of that department in the University of California School of Medicine, San Francisco. Dean J. B. deC. M. Saunders announced yesterday that Dr. Cullen will assume his new duties on July 1.

Dr. Cullen, 49, is now professor of surgery and anesthesiology at the State University of Iowa College of Medicine. He has been chairman of the division of anesthesiology there since 1938.

The new U.C. chairman is regarded as one of the four or five leading anesthesiologists in the United States, Dr. Saunders said. He is director of the American Board of Anesthesiology, the examining board for physician anesthesiologists, and is president-elect of the Society of University Anesthesiologists. His broad interests in fundamental and clinical research are reflected in a bibliography of 84 articles in medical and scientific journals.

Dr. Stuart C. Cullen, newly appointed professor of anesthesia and chairman of that department.

Dr. Cullen was born in Milton Junction, Wisconsin. He received the B.S. and M.D. degrees from Wisconsin State University in 1931 and 1933, respectively. He joined the State University of Iowa staff in 1938, after residency training under the New York University program at Bellevue Hospital. He has been chairman of the division of anesthesiology at Iowa since 1938 and professor of surgery and anesthesiology since 1948. Dr. Cullen is married and has two children.

Among Dr. Cullen's research interests have been the use of

curare and other muscle relaxants in anesthesia; the effects of drugs on respiratory function; the gas content of blood under varying conditions; and the physiological effects of xenon and other inert gases, including use of xenon in anesthesia.

In 1947 Dr. Cullen was a member of a medical mission to Austria sponsored by the World Health Organization and the Unitarian Service Commission; in 1953 he participated in a similar mission to India. He was organizer and senior instructor for WHO-sponsored international courses in anesthesiology in Copenhagen in 1950, 1952 and 1954. He is a member of the National Research Council Subcommittee on Anesthesia and the Advisory Committee to the Dean at the State University of Iowa College of Medicine.

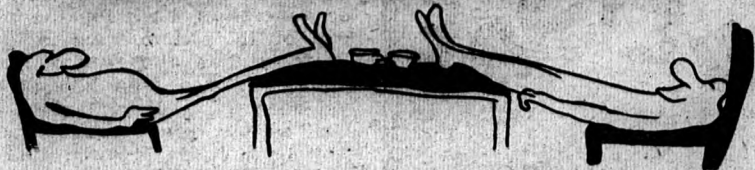

He is a member of some 15 American and foreign professional and scientific organizations, including the American Medical Association, the American Society for Pharmacology and Experimental Therapeutics, the Society for Experimental Biology and Medicine, Alpha Omega Alpha (honorary medical fraternity), Sigma Xi, the American Association for the Advancement of Science, and the International Anesthesiology Research Society.

Dr. Cullen's book "Anesthesia: A Manual for Students and Physicians" is a standard text; the fifth edition of which was published last year. With Dr. E. G. Gross, he is author of "Manual of Medical Emergencies." He is an associate editor of the journal Anesthesiology and the Year Book of General Surgery.

The anesthesiologist's interest also include general semantics, on which he has written and lectured, and college athletics. He has been a member of the Board in Control of Athletics at the State University of Iowa since 1946.

Dr. Neri P. Guadagni, assistant clinical professor of anesthesia will continue to serve as acting chairman until Dr. Cullen's arrival.

ON THE HILL

by Jack Hockel and Bob Neumayr

Up, Down, and Around THE HILL

CHARTER DAY IN THE UNION: With a program that was spirited by the singing of Dr. George Steninger, Father-of-the-Union, the Charter Day of this University was observed by a Medical Center which had its first chance to observe its new union . . . the gym was filled to capacity (and that's a lot); it's a fine gym and will be serving many purposes with the plans of operation which are being organized . . . it may even serve to improve the physical health of our students (if they find the time to use it). It's common knowledge how little exercise we are all accustomed to; aside from opening doors and pushing elevator buttons there's not an awful lot of it . . . all we need is that mystical thing called **SPARE TIME**.

A VIEW FROM EVERY ASPECT: San Francisco has almost as many different views as bars. But certain scenery is as good from dark to dawn as it is from dawn to dark . . . Certain mortals build shelters on impossible cliffs with impossible down payments to obtain these vistas. But the mere man can see these same scenes behind the window of the car. Of classic interest is **Telegraph Hill** if you're the "nautical type" with its view of the entire Embarcadero. For a closer look at shipping lanes the **Marina Greens** is a good choice with **Alcatraz Island** thrown in to lend stark realism . . . If of a more romantic inclination, there is **Inspiration Point** with the wide sweep of ocean flaring out from the bay with its two light houses standing guard on either side . . . For the "mariner type" there is **Ocean Beach** at Fleishhacker. And of course the back woodsman may find that **Lake Merced Blvd.** and lake may not substitute for the mountain lakes of the high Sierras but it's not far from the comforts of the city. And then the rugged mountaineers always pick "mighty" **Twin Peaks** to satisfy that instinct for meditation atop a mountain in Tibet. But perhaps you already know about these places, there are even others, we surmise.

MORE LIMERICKS:

A doughty young private of Leeds
Rashly swallowed six packets of seeds
In a month, silly ass,
He was covered with grass,
And he couldn't sit down for the weeds.

A near sighted fellow named Walter
Led a glamorized lass to the altar.
A beauty he thought her
Till some soap and hot water
Made her look like the Rock of Gibraltar.

There was a young lady from Lynn
Who happened to sit on a pynn
But to add to her contour
She'd stuck so much ontour
The point didn't puncture the skynn.

Student Church Groups

Saints, Sinners and Skeptics

Saints, Sinners, and Skeptics have elected their officers for this semester. They are as follows: Chairman, Shirley Albright; Program Chairman, Sylvia Fernald; Secretary-Treasurer, Adele Teza; Publicity, Norma Parker and Ruth Louis; Historian, Jeanne Gansel. Their next meeting will be on April 15th, and further information as to place of meeting and guest speaker will be announced in the next issue of the paper.

Newman Club

On Wednesday evening, April 9th at 8:00 p.m., Newman Club will present a lecture given by the Reverend Bernard J. Moran (Chaplain) at St. Anne's Library. Reverend Moran's subject is "The Meaning of the Mass." The lecture will be accompanied by a film.

Prof: "I will not begin today's lecture until the room settles down."
Voice from the rear: "Go home and sleep it off."

California Pharmacy Dean Honored by Wyeth Laboratories

San Francisco, March 20—Dr. Troy C. Daniels, dean of the School of Pharmacy of the University of California, was honored here recently for his 35 years of service to the pharmaceutical profession.

An oil painting of Dean Daniels was presented to him by

Wyeth Laboratories at a combined dinner meeting of the Northern California Hospital Pharmacists and the Northern California Branch of the American Pharmaceutical Association, held in Laurel Hall.

Dr. J. B. deC. M. Saunders, chairman of the University of California administrative committee and Dean of the School of Medicine, accepted the portrait on behalf of the university. It will be hung in the School of Pharmacy.

In making the presentation, D. O. Wilson, Wyeth divisional manager, declared that Dean Daniels' "years of service and excellence of performance have accrued to the entire profession, far beyond the borders of California."

"Dean Daniels," continued Mr. Wilson, "has contributed substantially to the professional growth of pharmacy. Thousands of former students now serving communities throughout the nation are tributes to the effectiveness of his teaching."

He cited also Dr. Daniels' service as first vice president of the A. Ph. A. and as past president of the American Association of Colleges of Pharmacy.

Mr. Wilson informed the audiences that Dean Daniels' portrait had appeared recently on the cover of PULSE OF PHARMACY, a Wyeth publication, as part of a series honoring pharmaceutical school officials. He revealed that the project started as a result of a survey in which practicing pharmacists across the nation cited deans of pharmacy schools as being symbolic of the profession's high standards.

Plans for Rummage Sale Progressing

On Wednesday, March 19, the Nursing School had their bi-monthly Student Body Meeting. Along with Pan American Airlines entertainment, the girls were spoken to by Pat Herring, owner of Patrick's Rummage Center, 999 McAllister Street, S.F. where the students will hold their May 9th sale. Her mission was to supply the girls with information on how to carry out a successful and profitable rummage sale. This was done very capably and much enthusiasm was generated throughout the group of student nurses.

As for other rummage sale activities, the girls have been quite busy creating posters and notices concerning the sale. These have been placed in various places with the intent of supplying the Medical Center population with accurate information so that all philanthropists can help these hard working student nurses with their sale. If you are feeling in a charitable mood, please let the students know.

Who said there was nothing new under the sun?

Wait until you see the new book and supply store

in the Millberry Union.

Until then... keep coming to the old Bear's

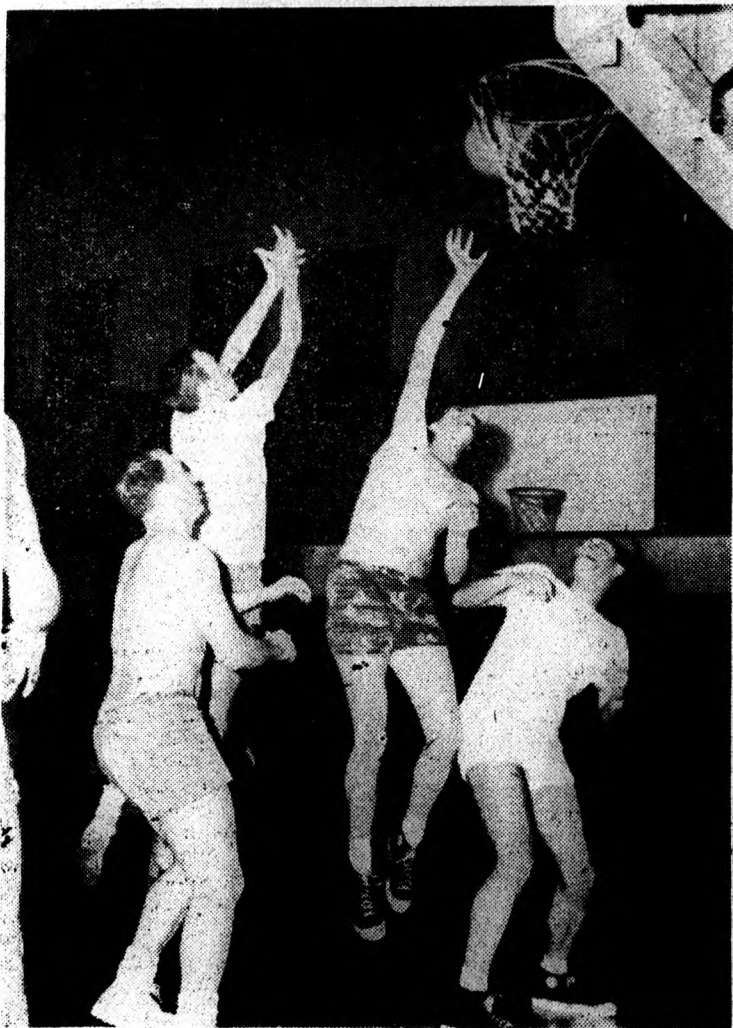

Lair.

SPORTS

By Mits Fukumura

Shown above are LDS's Dick Valentine shooting for two points as John Weaver (in shirt) of the Soph Meds attempts to block Dick's shot. Standing by to the left is Dean Robinson of the LDS's and to the right is Rog Nettles of the Soph Meds. The LDS's won.

(Photo by Ted Nakata)

Phi Delts Take League Lead

The intramural league lead, which was formerly occupied by the Zips, has now been taken over by the Phi Delts. The latter have won five straight games in five outings and appear to be gaining more momentum with each game. They are led by Gary Hasse with his deadly jumpshots. Backing up Hasse with scoring, as well as with rebounding power, are Fred Wilson and Bill Piper. All these men form a rough combination for any of the teams in the league to beat.

The Zips have gotten off to a bad start this semester by losing three of their four games. They forfeited one of their games to the Sr. Pharmacy; lost another to the Psi O's without the services of their star, Hap Stallman, and were defeated by the Phi Delts by one point. The latter game was a walk-away for the Phi Delts in the first half as they led by 20 points. However, in the second half, Stallman went to work with his cool "a la Baylor" jump shot and put the Zips back in the game. Norm McDonald helped Stallman greatly with his rebounding and short hookshots. Near the end of the game, Hasse, Wilson, Piper and company managed to hold off the Zips' threat and squeezed out a 42-41 victory.

The LDS's are holding their own and are now tied with the Zips for second place. Their only serious loss was to the Delts by a score of 32-28. It was a hard fought game until the very end with John McMasters showing the way for LDS, and Gordy Helmers popping in hook shots throughout the game for the Delts. Aiding McMasters was Dick Valentine with his scoring and Dean Robinson doing a fine job on the boards. The score was

close throughout the game and was won only in the last minute of play when a couple of fast breaks by Maurice Corbett and Dr. Hank Chinn gave the Delts four quick points and the victory.

The Kappa Psi's, having won five of their last six games, have earned themselves a spot as one of the top four teams. Coach Bud Taylor and his boys have come a long way since the beginning of the season. In their last game, a very crucial one, they lost to the Phi Delts, 26-24.

The Delts still hang on to fifth position and are followed closely by the Psi O's. Both teams lack bulk and height in comparison to the other teams but are capable of knocking over any of the top teams—as evidenced by the Delt victory over the LDS's and the Psi O victory over the Zips. However, the Delts have very capable players in Helmers and Corbett as do the Psi O's in Duke Lewis and Warren Adams.

The Soph Meds have increased book work this semester and cannot get all their players out for their games. Consequently they are suffering losses of games which, under normal circumstances, they might have won. However, they still have a scappy ball-club.

The Sr. Pharmacy team has won one game and lost three since entering the league. Like the Soph Meds, they are a scappy club and have the potential to give any club a run for their money.

The league standing up to Wednesday, March 19 is as follows:

	Won	Lost
Phi Delts	11	3
Zips	11	5
LDS	11	5
Kappa Psi	8	8
Delta	7	8
Psi O	7	9
Soph Meds	6	10
Sr. Pharmacy	1	3

Noon Topics

Last Wednesday Dr. Jurgen Ruesch addressed a SRO audience on the subject of "Non-Verbal Communication." His lecture was completely fascinating throughout, and he covered a topic which affects all of us in many ways. He began the discussion with a brief history of communication of man from the period of the Neanderthal man to the present time. He covered the development of written communication, first through pictographs, then to ideographs, and finally to the record of speech sounds instead of picture concepts.

Dr. Ruesch covered the changing needs of civilization, and went on to say that our understanding, like a mechanical computer, is based either on analogic principles, that is, principles based on models or pictures; or on digital principles, i.e. mathematical computations, verbal or digital processes. These principles are each good in their own respect, and neither principle is adequate in itself. Modern man tends toward the digital principle in his world of machines, power, and competition. He has, more and more, been neglecting the analogical facet of understanding and communication. "Man is part animal and part calculating machine." All of this has tended to develop a society which is incapable of integrating the analogical understanding in with the digital understanding. A knowledge of the humanities is becoming of lesser importance in the Age of Space. It has been said that a picture is worth a thousand words, and in this particular instance, it is the most perfect example of the value of analogical principles in communication.

In the Schizophrenic personality, there is an incapability of dealing with analogical procedures, and this is often the result of an extreme stress of digital procedures on children at home and in schools. Dr. Ruesch ended his talk with the thought that in order to have good mental health, people must be able to use both devices successfully.

The Music World

On Saturday evening, March 29th, at 8:30 p.m., Andre Kostelanetz will conduct the San Francisco Symphony in "POPS at the Opera House." Among the numbers to be played are: Ferde Grofe's "Grand Canyon Suite"; Harold Arlen's "Blues Opera" suite; the "Damnation of Faust" by Berlioz; and Liadoff's "Enchanted Lake."

Noon concerts will resume again after vacation on April 8, when pianist Marvin Turtak will play works of Haydn and Scriabin. The concerts to date have drawn enthusiastic capacity audiences to classroom B every Tuesday noon, and will continue on a weekly schedule — soon to be posted—for the rest of the semester.

A cello concert of traditional and contemporary compositions will be performed by Bonnie Hampton, Bay Area student of Pablo Casals, and Nathan Schwartz, pianist, on Tuesday, April 1, at the Century Club, 1355 Franklin Street, San Francisco. Tickets may be purchased at Sherman Clay.

The performance will be presented by KPFA, the listener-subscription FM radio station of Berkeley.

The program will include Sonata in G minor by Bach; Sonata, Opus 102, No. 2 by Beethoven; the premiere performance in San Francisco of Ernest Bloch's Suite No. 1 for cello alone; and the sonata in D major by Locatelli will complete the concert.

The San Francisco Youth Concerts are scheduled for April 8th, 10th, and 15th at 1:30 p.m.

Film News

Most of us probably remember the lovable Walt Disney cartoon feature—"Snow White and the Seven Dwarfs." This movie has

been revived many times, and each new generation loves it with renewed ardor. (Most of the older generation, back for the second or third time seem to love it too). For those who have young children who haven't as yet seen this delightful film, as well as for those who are just "young at heart," "Snow White" and her little friends will again dance and sing across the motion picture screen in a one-week engagement at the Fox theater.

Easter is coming, and so is lovable, laughable Danny Kaye in his new picture, "Merry Andrew." If Danny holds true to form, this should make a delightful evening's entertainment during those extra Easter holidays.

Other worthwhile pictures are: "The Brothers Karamazov," "Song of Bernadette," and "Bonjour Tristesse," which are all playing at theaters within the city.

King Bacchus

The A.S.U.C.M.C. announces the forthcoming Bacchus Dance, which will be held on April 19th. The dance will be on a Saturday night, from 9:00 to 1:00 at the Hotel Richelieu. Tickets will go on sale at the end of Easter vacation at the price of \$4.50.

King Bacchus will again be elected to reign as he has in the past.

The dance is an annual affair sponsored by the Associated Students of the University of California Medical Center.
